

MARCO LEALI

AI ENGINEER | Machine Learning, LLMs & AI Developer

Gothenburg, Sweden | lealimarco@hotmail.it | +46 73 871 28 52 | [LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

Master's in Language Technology with 6 years of experience in Data Analysis, Software Engineering and Business Development. Specialized in Machine Learning, Natural Language Processing (NLP), LLMs and Generative AI systems using Python and TypeScript. Experienced in developing industrial AI solutions such as machine translation systems developed in collaboration with the Swedish automotive sector.

PROFESSIONAL EXPERIENCE

Machine Learning Engineer | GU Collaboration Sep 2025 to Jan 2026

Volvo Trucks, Gothenburg, Sweden

- Designed a hybrid NLP and Machine Translation pipeline (Python, spaCy POS-tagging, Hugging Face OmniGEC-8B, Ollama/Llama 3.1) combining Volvo terminology-aware injection and LLM refinement.
- Evaluated MT system using standard (BLEU, ROUGE, BERTScore) and custom (TREU) metrics.
- Collaborated with the Standardization Team (CAST) to improve the source-database's structure.

Business Analyst | Sales and Business Developer Nov 2022 to Nov 2024

Smurfit Westrock Group, Lucca, Italy

- Analyzed large B2B datasets to support pricing, profitability and sales strategy.
- Built reports and dashboards (Power BI) to monitor KPIs across EMEA markets.
- Supported data-driven decision making for tenders and contract negotiations.

Technical Sales Engineer | Data & Pricing Analysis Nov 2019 to Nov 2022

Ghelfi SpA, Milan, Italy

- Developed pricing and sales performance reports for FMCG clients.
- Used data analysis to support technical-commercial decision making.
- Built long-term B2B relationships across industrial clients.

IT Consultant | Full Stack Developer & Software Engineering Aug 2018 to Nov 2019

Mainsim Srl, Genova, Italy

- Designed SQL-based data pipelines (ETL) and performed data integration (SQL Server, MySQL, VB).
- Built BI solutions and dashboards using Power BI and Qlik Sense for KPI monitoring.
- Supported deployment of maintenance management software from data setup to production.

Process Engineer Feb 2018 to Aug 2018

Carcano SpA, Milan, Italy

- Analyzed the production dataset to identify bottlenecks and to plan process optimization.

EDUCATION

Master in Language Technology | Conversational AI & LLMs Sep 2024 to Jun 2026

University of Gothenburg, Sweden

- Focus: Machine Learning, LLMs, VLMs, Python, multimodal Human-AI interactions (HRI).
- Thesis: *"Meditation experience with a Social Robot using LLM and VLMs"* - Built a multimodal interaction system integrating real-time visual input, LLM prompting and Conversational AI techniques to generate empathetic and context-aware responses.

MSc in Civil Engineering for Risk Mitigation Sep 2015 to Dec 2017

Politecnico di Milano, Italy - Thesis: *"Design of slope-stabilizing piles for landslide risk mitigation"*.

Bachelor in Civil and Environmental Engineering Sep 2012 to Sep 2015

Politecnico di Milano, Italy - Thesis: *"V. Bridge: SPT & DPSH and bearing capacity assessment"*.

CORE COMPETENCIES

AI & Machine Learning | Generative AI, Large Language Models (LLMs), Prompt Engineering, Vision-Language Models (VLMs), Computer Vision, RAG, PyTorch, Hugging Face, PyTorch, Deep Learning, API Integration, NLP.

Data Analysis | Data Engineering, ETL Pipelines, SQL (MySQL, SQL Server), Power BI, Qlik Sense, Excel.

Programming | Python, Javascript, Typescript, C, MATLAB, HTML, CSS, Full-Stack Development, Git/GitHub.

Languages | English (Fluent), Italian (Native), Swedish (Basic).
